

# Dry Type Cast transformers

## Cast resin

For their constructive characteristics, they are highly reliable and fulfill with the current health and safety standards.

In the presence of fire they have a low flammability and they do not emanate toxic gases that could endanger the environment and human life.

They have an easy installation. They just require some protection against accidental contacts and an adequate ventilation.

They are recommended for locations where safety, environment and electric power supply are essential, as residential buildings, malls (shopping centers), hotels, hospitals, subways, etc.

Dry Type Cast transformers

## Applications

- Distribution
- Industries
- Buildings
- Electric generation plants
- Traction
- Oil & Gas
- Mining
- Naval
- Creation of artificial neutral
- Cogeneration
